The three-course certificate program, included  
Medical Translation, Legal Translation, and Business  
Translation.

### Bootcamps

#### December 2023

QA Minds Lab

Automation Tester using Selenium Webdriver with  
Python.

#### June 2023

Quassure

QA360.

#### April 2023

QA Minds Lab

Manual Software Testing.

---

## My experience

### Manual Tester

#### In-Progress

UPEX

My activities include:

- Conducting exploratory testing.
- Mind Maps design.
- Test Analysis and Planning, which include: Traceability, Testing Coverage, and Requirement Analysis.
- Test Execution.
- Test Techniques (Boundary Value Analysis, Equivalence Partitioning, State Diagrams, and Decision Tables).
- Documentation of Tests Cases and Defects.
- Report Generation.

Additionally, I am familiar with Scrum ceremonies such as sprint planning, daily scrum, sprint review, sprint retrospective, sprint grooming, and scrum poker planning.

### Automation Tester

As the final project for the Automation Bootcamp, I conducted automated testing on a website. The project aimed to fulfill predefined acceptance criteria, including closing pop-up windows, navigating through the website menu, selecting some options and extracting data into a .csv file. Additionally, I implemented the Page Object Model design pattern for enhanced maintainability and scalability. The project's code and documentation are available on my GitHub repository for review.
