QA Minds Lab.

Manual Software Testing.

My experience

Automation Tester

I've been practicing with tools like Python, Selenium, and PyUnit.
To explore the automation projects I've been working on recently, please visit my git profile in the link above.

Manual Tester

In-Progress
UPEX
My testing activities span a wide range, from exploratory testing to comprehensive Test Analysis and Planning, covering Traceability, Testing Coverage, and Requirement Analysis. I utilize various techniques like Boundary Value Analysis and Equivalence Partitioning for test execution, while also documenting Test Cases and Defects to generate detailed reports. Additionally, I'm well-versed in Scrum methodologies, actively participating in ceremonies such as sprint planning, daily scrum, and sprint review.

**Spanish-English
Translation Certificate**

2020-2021
The University of Arizona.

The three-course certificate program, included Medical Translation, Legal Translation, and Business Translation.
